In this piece the right hand is legato throughout against two-note slurs in the left hand. Practice first at slow tempo increase the speed as finger fluency develops.

A TRIPLET is a group of three notes (or chords) played in the time normally given to two notes of the same value.
It is indicated thus: ${\underset{3}{J} \text {. }}^{\circ}$
In the following example the three eighth notes in each triplet will be played on one count.

If you enjoy playing favorite themes from Symphonies in duet form (one piano-four hands), the book of "MUSICAL MOMENTS FROM THE SYMPHONIES" by Lois Long is recommended.

## SYNCOPATION

When an accent is taken away from a strong beat and placed on a weak beat, the normal rhythmical flow is disturbed and the result is known as SYNCOPATION.
In the following example, all syncopated beats are shown by a little black triangle thus. Syncopation can be produced in three ways. By THE TIE (line 1), THE LONG NOTE (line 3) or THE REST (lines 4 and 5). Count aloud at first, using the word "AND" on the half beats shown by this sign $=+$.

Shortnin' Bread

For those wishing to make a further study of Syncopation - its cause and effect - John Thompson's SYNCOPATION MADE EASY, Books 1 and 2 are recommended. In addition to the knowledge presented, they supply many interesting "Party Pieces". The above example is from Book 1.

This sign, $\phi$ is called alla breve and is used indicate ${ }_{2}^{2}$ which means there will be TWO counts to each measure and ONE count to each HALF NOTE.

However, learn the piece first in Four-Four, counting four as usual. Later as speed develops, reduce the count to two=one count to each half note.

Concerto in A minor

An interesting supplementary piece at this point would be "CONCERTINA" by John Thompson. It is a Concerto in one movement with the accompaniment scored for second piano. It was especially composed in order to furnish a Concerto for pupils in this grade.
Easy to play but sounds "big".

This is the sign of the DOUBLE SHARP * . It means that the note before which it is placed must be raised TWO half-steps.
You will have some "white sharps" in this piece; ie, E\#, B\# and the double-sharps which fall upon white keys.
But don't allow the 6 -sharp signature to cause any concern. The left hand part is pretty much the same throughout. Just remember to play everything sharp but B (with one exception) and all will be well.
When learned, you will have in your fingers, one of the most beautiful melodies ever penned.
